

Please read before using your training head

1. This deluxe training head is made of the finest 100 % human hair, which has been hygienically sterilized.
2. In order to prevent hair from becoming matted or tangled, the cuticle of the hair has been removed.
3. The hair has been chemically treated and processed to withstand repeated use in the classroom.
4. It is not unusual, especially for new blonde training heads, to have some loose hairs. Brushing the training head's hair before proceeding will eliminate these loose hairs.

Care instructions

1. To rinse, use lukewarm water (60-95° F = 15-35° C). Never use hot or cold water, as it causes hair to mat or tangle.
2. Dilute waving lotion slightly more than for use with a human head.
Full strength waving-lotion may cause hair to mat or tangle.
3. If the hair becomes badly tangled, allow it to dry thoroughly, and then gently comb it.
4. An unpleasant odour may result from hair remaining wet for over 8 hours.

Guarantee of disinfection

This certifies that the human hair on this training head has been chemically bathed and disinfected with maximum safeguards to obtain 100 % hygienic hair, free of any organic matter. The complex and scientifically-approved procedure by which the human hair on this training head has been disinfected is as follows:

1. Boiled in water for six (6) hours
2. Rinsed in clear, natural water
3. Placed in an ACID BATH for 15-20 minutes
4. Soaked in SODIUM HYDROXIDE to neutralize the acids
5. Rinsed in clear, natural water
6. Washed in a mixture of HYDROGEN PEROXIDE (H_2O_2) and AMMONIA
7. Rinsed thoroughly in clear, natural water
8. Shampooed, conditioned and air dried.

Each training head has passed a thorough inspection before delivery.
